© March 2015 by ProvenNutritionForKids.com. Information gathered through company phone calls & emails from Spring 2014-Spring 2015.

All companies were approached the same way, very politely, as though we were a potential customer wanting to buy their product.

All information in these boxes was received by the company customer service representative and not the manufacturer. Thus, the accuracy is very suspect.

Our personal company of choice due to full disclosure, quality, and personal experience.
